

# Project report

## Product

Round files

## Task

Packaging development for round files

## Initial situation

PVC-bags consisting of a printed film on the bottom and a transparent film above, as well as a foil to strengthen the head and the root. The files were packed manually.

## Solution

The files are inserted fully automatic in cardboard boxes with a flag window. The protection of the files is ensured with a PE-film.

## Result

- Automation was possible with the existing line
- Large reduction of packaging labour costs
- Tamper-evident closure
